## **DETAILED ACTION**

### ***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the elements of claims 26-50 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Specification***

The amendment filed June 9, 2008 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: support for new claims 26-50 is not found in the original application.

Applicant is required to cancel the new matter in the reply to this Office Action.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 26-50 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 26 recites "selecting a type of sensor." This step is not found in the application as originally filed. Although various sensors are discussed in the application, the step of selecting a sensor is not found. It appears at first glance that an aircraft has a specific sensor, and the algorithm is applied to an image taken by the specific sensor. No selection is performed because no other sensor is present.

Claim 26 recites “acquiring an image of a scene with the sensor mounted on a platform, the image including at least one sensor parameter that indicates a perspective of the sensor relative to the scene.” This element is missing from the application as originally filed. Again, at first glance, it appears that acquisition parameters about an image can be identified, but they are not part of the image.

Claim 26 recites “determining a center of the scene in the sensor image based on a coordinate system associated with a reference image database and a digital elevation database.” The elements of this claim are not found in the application as originally filed.

The other elements of claim 26 are also not found in the application as originally filed. For example, where is the mutual information model?

Applicant should identify support in the application as originally filed for each new claim and each element of each new claim.

Applicant has canceled claims 1-25 and added new claims 26-50. Applicant has not pointed out where the new claims are supported in the application as originally filed, nor does there appear to be a written description of the claimed limitations in the application as originally filed. See *Hyatt v. Dudas*, 492 F.3d 1365, 1370, 83 USPQ2d 1373, 1376 (Fed. Cir. 2007) (holding that MPEP section 2163.04(I)(B) as written is a lawful formulation of the *prima facie* standard for a lack of written description rejection).
